

CITY OF CAPE CORAL CHARTER SCHOOL AUTHORITY

VISION STATEMENT

“The school community that comprises the City of Cape Coral Charter School system loves their students, and believe that everyone can succeed and reach their dreams and personal visions.”

Our schools offer a beautiful and safe environment that inspires learning, but we also know that we need the support of our entire community. Our students need loving parents who nourish them and send them to school ready to learn, who value education and help them with their schoolwork. In the spirit of cooperation, our schools welcome **parents and families** to actively become involved in school programs and activities, and require families to volunteer and partner to assist our mission.

Our **teachers** are caring, qualified, and committed to excellence in classroom instruction. They establish and honor positive relationships with their students. Our **administrators** lead with student achievement and student welfare at the heart of each decision they make. Our **support staff** all work hand-in-hand to meet the needs of each student, and ensure success for all.

While academic success and superior test scores are critical to our schools, our vision embraces much more: our schools are places where children are happy and excited to learn; our curriculum and teachers challenge students to not only think critically, but to use common sense in their lives; our students learn values, and value service to others; our students feel free to imagine, to create, and to shape their interests and talents for future careers.

We may not see the results of our efforts to provide outstanding opportunities for our students, but the world will know their service, and witness their accomplishments.
